The Sister St. Odilon Library at the Misericordia Health Centre is now open in its new location.

The Library has been closed since October 2011 as part of reconstruction at Misericordia Health Centre. Renovations of the new library in the Misericordia Education and Resource Centre were completed and a formal opening will be announced this Spring. The Library is open to University of Manitoba faculty, staff and students. Patients, residents, families, and the general public are welcome to visit the Library. The Library is named for Sister St. Odilon, who held various leadership positions at the Misericordia Health Centre, including Director of the School of Nursing.
